PROFILE

I am a Software Engineering student pursuing a Bachelor of Science degree at the University of Info Myanmar, with good academic performance and volunteering experience. I have intermediate level proficiency in English and have achieved HSK-3 proficiency in Chinese. My objective is to build a career in software development and project management, leveraging my technical skills and communication abilities.

EXPERIENCE

- Led a team of four members, overseeing their tasks and coordinating project timelines. Adapted project schedules as necessary and reported progress updates to the supervisor. Improved communication and teamwork among team members to ensure successful completion of the project. (Oct-2022)
- Produced sales, financial, resource utilization, and customer complaint analysis reports for a customer software development service company using Power BI software. These reports provided valuable insights to support strategic, tactical, and operational level decisions. Communicated with the supervisor to ensure the accuracy and relevance of the data and reports generated (Jan-2023)

SKILLS

- Problem-solving
- IT support
- Programming
- Web development
